

A local town centre is in the making.

Our future Village Town Centre will provide villagers with a vibrant hub for local shopping, employment and social activity. Here you will get to know your local shopkeeper by name.

With plans to create over 8,000m² of retail space, The Village Town Centre will have the potential to be anchored by a major brand supermarket. It will also house local convenience stores and a range of speciality retailers.

Additional commercial and mixed-use spaces will provide villagers with employment opportunities or the ability to operate their business ventures closer to home.

Extending the urban design principles that enhance village life, The Village Town Centre will enjoy an easy connection with public transport services and local road networks. The Village Town Centre will also be pedestrian and bike-friendly, connected to The Village neighbourhood via a series of walking and cycling paths.
